

Diamond KC9910Y

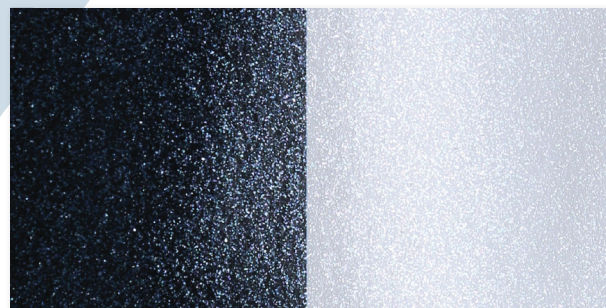

SUPER FLASHING DIAMOND WHITE

Product Information

FASCINATED BY THE STARRY SKY

Diamond KC9910Y blends striking coarse glitter with extraordinary reflective power

The ultimate in **coarse glitter** combined with a **completely transparent substrate** to guarantee the high impact of the final product.

Diamond KC9910C combines **transparency, spectacular glitter** and **high reflection** in one pigment. A pure white observation color provides purity and allows for multiple usages in different color stylings.

The pigment is thicker than comparable pigments in the borosilicate group, which makes it **more stable** in processes with increased shear forces.

DIAMOND KC9910Y

Optical Features	Special Product Features
Eye-catching, coarse glitter	Strong glittering white based on borosilicate
Extraordinary sparkle	Most of the neutral base color provided by the substrate
Pure white reflection highlights	Even low concentrations produce an incredible finish
Completely transparent	Suitable for all common effect pigment applications
Very low influence on the background color	Higher mechanical stability

ORDERING INFORMATION

Product	Color	Package size
Diamond KC9910Y	Silver pearlescent	Samples, 1 kg, 5 kg, 20 kg

PRODUCT INFORMATION

Property	Chemical Name	CAS no. / Value
Composition	Calcium Aluminum Borosilicate	65997-17-3
	Titanium Dioxide (TiO ₂)	13463-67-7
	Tin Oxide (SnO ₂)	18282-10-5
Particle size distribution		100-700 μm
pH Value		9.0 -11.0
