

Vibrant effect tones and body color

KYNTALINE PURPLES

Product Information

KYNTALINE PURPLES

A complex color in many different facets -
From spiritual blues to rosy reds

Violet is considered to be the one of the most complex colors. It creates a balance between the spiritual blue of the sky and the fiery red of the earth.

Intensive and rich pigment color tones in shades of blue and red give industrial products an outstandingly **bright chroma** and exceptional reflectivity.

Created without the addition of organic colorants or carmine, Kyntaline Purples exhibit an impressively **intense** and **pure body color, vibrant sparkle,** and **good hiding power.** The color is stable without risk of bleeding, fading or migration in every final application.

The Kyntaline Purples product series is based on **synthetic mica** (Fluorphlogopite), which delivers **purity of color, brightness,** and outstanding **reflective power.**

KC818V Kyntaline Nebular Purple

KC819V Kyntaline Vivid Fuchsia

KC820V Kyntaline Lightning Violet

KYNTALINE PURPLE SERIES

Optical Features	Special Product Features
Intense and pure body colors from reddish to bluish purple color shades	Based on synthetic mica
High brilliance and gloss	Perfect balance of sparkle, color intensity and particle size.
Exceptional reflectivity	Powerful shimmering purple tones - ideal for extraordinary color formulations with a high color stability and temperature resistance.
Extended hiding power due to small particle size	Suitable for all common effect pigments applications
Intensive body color	Multilayer technology
Extensive styling potential	Without carmine or organic colorants, there is no fading, no staining, no bleeding and no color migration.

ORDERING INFORMATION

Product	Color	Package size
Kyntaline KC818V	Rose-purple pearlescent	samples, 5 kg, 25 kg
Kyntaline KC819V	Pinkish-purple pearlescent	samples, 5 kg, 25 kg
Kyntaline KC820V	Bluish-purple pearlescent	samples, 5 kg, 25 kg

PRODUCT INFORMATION

Composition* Chemical Name	CAS no.	KC818V KC819V KC820V		
Synthetic Fluorphlogopite	12003-38-2		X	
Titanium Dioxide (TiO ₂)	13463-67-7		X	
Iron Oxide (Fe ₂ O ₃)	1309-37-1		X	
Tin Oxide (SnO ₂)	18282-10-5		X	
Particle Size Distribution			10 – 45 µm	
pH Value			4.0 – 7.0	

* detailed values can be found in our specifications
