

# SEASONAL COLOR WINTER 2022/23

Tinted Black

## Make your Eyes Pop

Smudged smokey eyes are right on trend for a sexy, slightly sinful look. This smoldering makeup technique has a highly expressive, dramatic impact, last seen in the 1990s. Dark colors are used to make the eyes stand out and become the absolute focal point of the face.

Our bold tinted black is ideal for achieving that effect for an exciting party night but is also appropriate for everyday use.

Discover Black Red, our seasonal color for winter 2022/23 with its unique, magnificent black pearl luster.

## Spellbinding Tinted Black – Glossy and Potent

Nothing is as timelessly elegant as deep dark red nail polish, sensual and graceful at the same time.

This shimmering black red is the color of strong personalities and conveys self-confidence, charisma and strength.

Black Red is a transcendent color that captures the mysteries of the universe and the metaverse. This deep shimmering tinted black pigment is characterized by a magnificent dark burgundy shine and a subtle metallic gleam.

## Infinite Beauty – Dark Lipstick on Trend

Black is not just black! As with any lipstick, the right undertone is critical.

While black forms the base of our pigment, it is enhanced with a mesmerizing dark red shimmer with great depth that gives it its seductive appeal.

The warm red undertone of Black Red celebrates the intensity of black while giving it a strong yet feminine aura.
